</tbody>
</table>

**PROPERTIES:**
- Viscous liquid that is able to adhere to the screens, even if in vertical position
- Suitable for both polyester and nylon meshes
- High cleansing power
- Concentrated formula, excellent quality/price ratio
- Risk labelling-free

**PREPARATION:**
CLEANSER 100 must be diluted with water. The following dilution ratios are recommended, depending on the dirty level of the mesh:
- 1:5 for degreasing of very dirty surfaces
- 1:20 (maximum) for normal cleaning treatments

**APPLICATION:**
- Rinse the screens well with lukewarm water
- Apply CLEANSER 100 through a sponge onto both sides of the screen, in a quantity that is enough for soaking the mesh well.
- Once the product has been applied, let it act for a few minutes.
- Rinse off the screens abundantly with water.
- Carefully dry the screens before applying the photoemulsion.
- Avoid letting the product dry onto the screens, since this oversight could weaken the mesh elasticity.

Package: 1 Kg

</table>

Concentrated degreaser indicated for the cleansing and cleaning of the cylinders before the application of the photoemulsion. It helps a better adhesion of the photoemulsion to the metal surface of the cylinder.

### Properties:
- Concentrated solution
- Excellent degreasing power
- Particular (phosphating) effect of protection of the metal surface
- Solvent-free

### Preparation:
ROTONET CONCENTRATO must be diluted with water. The following dilution ratio is recommended: 1:4.

### Application:
- Dip the cylinder to be degreased into a STAINLESS steel or PVC basin, which contains a solution quantity of ROTONET CONCENTRATO and water that is enough to completely cover the cylinder.
- It is recommended to let it act during 5 minutes.
- Pull the cylinder out of the basin and abundantly rinse off with a water jet, in order to avoid its blackening due to oxidation.
- Let the cylinder dry into open air or into oven at the maximum temperature of 40°C.

### Special Instructions:
- Carefully follow the instructions indicated in the security data sheets.
- Do not use ROTONET CONCENTRATO into basins that are not made of STAINLESS steel or PVC.
- The basin containing the solution of ROTONET CONCENTRATO and water must be always kept covered, the product looses its effectiveness after repeated use; periodically add fresh product and completely replace the solution after three additions. As an indication, by cleaning 15-20 cylinder per day, one by one, add fresh product to the solution once every three months and completely replace it after one year.

### Package:
5 and 20 Kg
